# National Ligament Registry

## Registry Workflow

The National Ligament Registry (NLR) is a licensed version of the Amplitude *pro registry*<sup>™</sup> software, available for Knee Ligament Surgeons based in the UK.

The purpose of this document is to demonstrate the process flow of the NLR registry, with clear indications of what actions take place and at what intervals. The patient, the surgeon, their associated support staff and the system all play a role in the NLR process.

*Please note: This process is suggested best practice from Amplitude. NLR users may choose to adopt their own process should they see fit to match their current data capture processes.*

What	When	By Whom
Patient added to the registry via secure web based clinician portal	When scheduled for medical intervention	Consultant's support staff

What	When	By Whom
Email sent to the patient to collect pre-operative outcome scores	Two weeks prior to treatment	The NLR system

What	When	By Whom
Patient completes electronic consent form and completes pre-op scores at home via web based patient portal	Before treatment	Patient

What	When	By Whom
Procedure form completed via web based clinician portal	Day of treatment	Surgeon

What	When	By Whom
Post-op scores sent via email to patient	As per data schedule (6 months, 1 year, 2 years, 5 years)	The NLR system

What	When	By Whom
Post-op scores completed at home via web based portal	As per data schedule (6 months, 1 year, 2 years, 5 years)	Patient
